

# **TFU HEATING CABLE MAT**

# Heating Cable for Ourdoor Use

TFU is an efficient solution for snow and ice melting. The TFU2 heating cable mat can withstand temperatures under installation up to 270°C, and it may be covered with hot asphalt without additional covering. This takes the response time down to a minimum, and eliminates the cost of covering the cables with aggregate. The TFU2 heating cable mat may also be installed underneath pavers or poured concrete. TFU2 can be used both for whole and partial covering of areas. The mat width is 50cm, which makes it very well suited for laying down in tire tracks on driveways etc.

The heating cable can be laid out to cover either part of or an entire area. The element width of 50cm makes it especially suitable for tire tracks for vehicles.

The TFU2 heating cable mat has a twin conductor cable with an output of 300W/m<sup>2</sup>.

## **PRODUCT FEATURES**

Outdoors

- · Driveway tire tracks
- Pavements and walkways
- Ramps

## **PRODUCT COVER**

Asphalt, Concrete, Pavers

Asphalt, concrete and pavers

#### GROUND PROTECTION/RCD/THERMOSTAT

All heating cables must be equipped with an RCD tripping at a maximum of 30mA. The heating system must also be equipped with an electronic thermostat that enables the user to adjust the temperature. The thermostat also protects the system from overheating and switching on at unwanted times, for instance in the summer.

## **PRODUCT DATA**

Cable type	Twin conductor, grounded
Effect per m <sup>2</sup> (watt per m <sup>2</sup> )	300W
Cold lead	5m
IP Code	IPX7
Certification	Reach, RoHS
EN Standards	CE
Warranty Norway	10 years
Product Width	500mm
Customs number	85459000
